His Great Case

VIRGINIA LEE

(Copyright, 1916, by W. G. Chapman.)

Twice within the hour Mrs. Edna. Danvers had seen the tears fall from the eye of her bired seamstress upon the work in her hands. The latter thought herself unperceived, and when Mrs. Danvers came directly near to her, she smiled to conceal her emotion, and went on briskly with her

She broke down utterly as she was left alone in the room. Mrs. Danvers had gone into the hall. She paused there at the sound of gentle sobbing. She stole back softly into the room, gently lifted the work from the hands of her seamstress, stroked back her hair, kissed her and sat down facing

"Now then, my dear," she said in her pretty, persuasive way, "tell me all your troubles, for you have some. I've found that out, and I'm going to find out the rest of it and help you, if I can and you will let me."

The flood gates broke loose. It

was just such sincere and soothing sympathy that the poor soul, wearing her life away over the needle, Soon other tears were mingled with her own and loving arms supported her.

Pitiful and impressed, Mrs. Danvers listened to a story that aroused her keenest interest. Mary Walters was the wife of a convicted felon. They had one little child, and she was now its sole support and her own, for her husband was in prison, awaiting trial on a charge of burglary.

"He is not innocent," the seamstress reluctantly admitted, "but, oh! he tells

"I Give You My Word."

He would have been two years in the penitentiary only for received from him a letter which he your kind, good husband."

"And now." spoke Robert Danvers to his wife the next day, "having lent save the postscript. This was beyond myself to another of your philanthropic notions, suspend the series until writing expert, who after some study I give my unrestricted attention to my great case."

"There is a 'great case,' then," said Edna.

"And a royal fee, if I win it," declared her husband. "I am fighting the smoothest lawyer in the city, that is Hugh Boydston. He is slick, tricky. unprincipled. He works in the dark, by the flower lover. Many experiand it is going to take unusual wit and ability to circumvent him."

Of that case Edna knew all the details from time to time. The "great case" became the constant theme of thought and anxiety for the family. "So much attached to winning itin fact, fame and fortune," the lawyer asserted.

Mrs. Danvers had further need of the seamstress, and Mary Walters came often to the Danvers home Edna often spoke to her of the great Then it came about, when John was released and came back home and started in to earn a really honest livelihood, that Mary referred to the case

and John listened with interest.
"I'm a grateful man." he said, thoughtfully, "and I shall never forget this Mr. Danvers."

John continued to ask Mary con stantly for further details of the case. Bit by bit he burrowed out the sentient facts.

"So the case hinges on what kind of a case that tricky Boydston is going to put up?" he remarked. "The weakness of Mr. Danvers is in not knowing what the defense is to be, eh? I'll wager it's a black plot, for I know Boydston. He's a hard, cruel,

John Walters said little after that, on one side and, being of archeo but one evening shortly afterwards an incident occurred that shocked and curator of the Government museum, alarmed Mary. Little Freddie, todding about his father, had pushed been in use during the reign of Tamerfrom his coat pocket a tool. It fell lane.

to the floor. John flushed and Mary

"Oh, John!" she gasped in horror, for in a flash she recognized the tool as a burglarious implement—a picklock. She had seen such in his past

"Don't worry, Mary," said John, with affected lightness. "I'm not going to get into any trouble." "But the picklock, John," quavered-

"It can mean no honest pur-

"I give you my word I have not thought of returning to my old wicked way," spoke John solemnly, and Mary was sure she read honesty in his eyes, and was compelled to be content.

"I shall not be home till late," he wrote Mary three nights later, and her soul was rent with anguish. Had John met with his old companions? Had he again fallen by the wayside? Midnight, one o'clock, two o'clock, three and then—his step, brisk and steady, his voice clear and happy, and then he folded her in his arms.

"Take that," he said, releasing her and drawing forth the picklock. "Don't shrink from it, girl! a big debt, as you'll know later. Tie a bow of pretty ribbon around it, and hang it on the wall for an ornament. Some time I'll tell you a story about it that will make you proud of me. Go to bed, dear: I have some work to

Then way up to dawn, John Walters sat copying in a clear, legible hand pages of rough penciled notes. He had the neat manuscript all completed and folded as Mary announced breakfast

"I want you to take these papers to your good friend, Mrs. Danvers," he explained.

"Why, John?" spake Mary in sur prise; "what are they?"

"The complete outline of the case that scamp, Boydston, has against Mr. Danvers. Don't you understand? 1 had quite a seance all alone by myself in the Boydston office last night. My old trade, you know, getting past the door. The strong box was a mere bread can against my skill. I copied all I needed, and old Boydston had a forgery or two among the documents. More than that, you get word to Mr. Danvers that two witnesses Boydston plans to use on the stand are professional hired perjurers. I happen to know them. I've got the goods on them that would land them in prison. I'll see to it that they don't appear on the day Boydston expects them, trust me, and Mr. Danvers will win his case."

"But, oh! John, if they find out-"That I tried my old trade for a good cause?" cried John-"let them! I'm proud of it, but they won't and Mr. Danvers will win his great case."

And what John Walters predicted

came about. The day of the trial there was a discomfitted and baffled legal antagonist and a rightful triumph for Robert Danvers-and the big fee, and fervid happiness for Edna, and for the humble burglar a new start in life when Mr. Danvers or hotbed. learned of his grateful part in the

He Asks Thief to Fight.

One of the most curious offers ever nade to an unknown thief was that once made by a Monmouthshire farm-He had occasion to slaughter a cow, and the carcass was placed in the outhouse. Next morning it was found to have been denuded of every particle of suct, whereupon the farmer issued the following notice:

"If the person or persons that it be that they are not in want, and A mighty resolve came into the the thief is a man and will come for

Their Care and Cultivation TOWN

The Daisy Should Have a Place in Every Garden.

DAISIES

By L. M. BENNINGTON. .. o flower in all the garden series is

more beloved than the star-eyed daisy, or marguerite. And perhaps no flower has undergone a more decided improvement than this same flower, which fills the meadow spaces with its nodding white and in better soil looks statelier from the garden path.

The daisy should have a place in the garden. They make delightful borders to beds of taller-growing annuals, and can be used very effectively in beds of spring-blooming bulbs.

Daisies may be sown at intervals for succession, in shallow boxes of light. rich soil. Cover the seed to about three times their own thickness, and press the soil firmly over them. Keep the box in a warm window, greenhouse

Transplant to new boxes and set out in the open ground when danger from frost is past. Daisies can be sown in beds outside in August or September. They must be protected with straw or litter through the winter and transplanted to their permanent position in the spring.

The orange daisy, South African orange daisy, has become a great favorite. It was introduced a few years ago and has been made much of at the flower shows and is used largely on big estates. It is excellent for bor ders and as a pot-plant.

THE WHITE CARNATION

BY BETTY PAKE.

The search for the pure white car color for a long period, has never been quite successful.

It is a fact that the average variety remains under cultivation but a few years, and they are constantly running out. They must, herefore, constantly be replaced by newer and more vigorous varieties grown from the seed. Often a carnation that produces beautiful white flowers for two or three years fails entirely after that

time. The common garden soil will not do for the carnation. It should be composed of about three-fourths rich, dark loam and one-fourth well-rotted ma-This should be thoroughly nure. mixed several times and by September the first cuttings should be placed in boxes about five inches deep. Set

the plants about ten inches apart. Syringe thoroughly with water until they have a good start. The plants should be staked in order to keep the flowers above the foliage.

The soil should be frequently treat ed with liquid manure cow, sheep, or hen droppings are excellent-but should not be too strong, say about the color of weak tea. If you want large flowers you must

them plenty of water and ventilation, and syringe with tcbacco extract to effect. discourage the red spider.

If potted, they should be in pots of from four to seven inches according to the size of the plants. The best way is to propagate them

ered as long as tossible. The early thing they are looking for:

frosts will not injure them. As the cold weather comes on, cover the sashes, but on bright, sunshiny days uncover and give them plenty of air.

Of course in very severe weather they must be thoroughly protected against freezing. If they are properly cultivated they will bloom in a month or six weeks.

While carnation growing is not par ticularly difficult, the plants must be attended to with great regularity. They are rich feeders and therefore must have very rich soil, plenty of water and all the air and sun they can get at the last in order to bring them forward quickly.

CRIMSON RAMBLER.

Some roses-the crimson rambler, for instance—seem particularly liable to mildew. If outdoors the disease may be kept in check by using the ammoniacal solution of copper car-bonate applied faithfully with a sprayer, about every two or three weeks, or oftener, if the case seems to require

Myposulphite of soda, used in proportion of half an ounce to ten gallon of water, is a good spray. In some cases, however, nothing serves to do any good.

TRY CYCLAMEN

Among winter-flowering plants there is nothing more beautiful than the bulbous greenhouse plant, the cycla- little color in red, white and blue

perature of the living room. Their marked foliage and their variety of shades and wealth of coloring make them an agreeable adjunct to the list of house plants.

THE BEAUTY OF HYDRANGEAS

By LIMA R. ROSE. One of the best late flowering, hardy

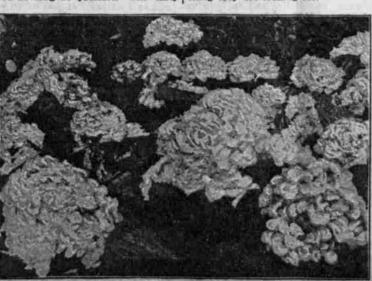

shrubs is the hydrangea. While there are other shrubs that

I like better, this one seems to be a favorite with the masses. It has the merit of extreme hardiness, easy culture, great fioriferousness, late blooming and persistency. Its flowers lose their early white-

ness as the season advances, but in their pinky brown stage they are not without attractiveness, and even after snow comes they afford pleasing effects when seen against a background of pure white.

In planting the hydrangeas, I would never advise using them singly. They are vastly more effective grouped. By this means we secure for it a strength and dignity which disbud the plants judiciously. Give single specimens never have. Planted thickly this plant produces a grand

Those who are in search of a plant that will grow in any soil and under almost any condition, and has hardiness enough to withstand the trying ordeal of the severest northern winin cold frames, leaving them uncov- ter, will find the hydrangea the very

MANAGER SYSTEM IS LIKED

Has Been Given a Year's Trial in Tucson, Aris., and Seemingly Is There to Stay,

Tucson, at the close of a year under the city manager system, is pleased with it and will continue it, though it is free to abandon it, since the system exists by a sort of understanding and not by charter. The old council system prevailed in Tucson, but it was decided before the election to give the manager system a trial for at least a year. It did not seem that under such an arrangement the system could have a fair trial. If the council should at any time divide to engage in politics, the system would go by the board. But, fortunately, the mayor and the council have earnestly assisted in making it a success. They selected a good man for manager and delegated all the power possible to him. There has been no interference with his appointing power. No pressure has been exerted upon him in favor of any applicant for a job. There has been no taint of politics in the city government, which has been the best Tucson has ever had. More has been accomplished in the last year than in any previous year. What has happened in Tucson has

In the beginning there was a little farring of the machinery, but for several months it has run smoothly and the result has been profitable in money and good government. Even more is promised for the next year. If it should ever fall down or fall here or elsewhere, it will not be the fault of the system, but the fault of the people in failing to elect the right kind of commissioners, and the peo ple will never commit such a fault if they remain alert to detect the first sign of political canker.-Arizona Re-

system has been given a fair trial.

Phoenix's experience of a year and a

half with it has been entirely satisfac-

STYLES IN FLOWER BEDS

publican.

Excellent Idea Sometimes to Get Away From the Conventional Designs So Often Seen.

Do not be afraid to get away from the conventional when making flower beds. Have beds different from those of the neighbors and different from last season's beds. Geraniums, coleus and the other old bedding favorites are good, but it is tiresome to see them everywhere. Verbenas are not bedding novelties, but might be used more generally; also petunias, abutilons, cupheas, fuchsias, balsams and ivy leaved geraniums.

A mixed foliage bed of tropical appearance can be made by the use of the following plants in such combinations as may be desired: Aspidistras, ficus in variety, crotons in variety. dracaenas, pandanus, pepperomia palms in variety, sansevieria, echeverias, ferns, grevilla robusta, white leaved cineraria and centaurea, pyrethrum, goldenfeather, farfugium, maurandias lobelias, lantanas, cupheas. The last three named will supply a flowers to lighten up the color of the They come highly recommended for various foliage plants. The taller use culture as they thrive well and plants scattered about the bed will bloom profusely in the average tem- supply shade for the smaller shadeloving plants and the ferns, which quaintly formed flowers and oddly should be tucked in naturally to fill up space. The variety of colors in the foliage of dracaenas, pandanus, crotons, cineraria, centaurea and pyrethrum will contrast well, if the planting is arranged with care, and the whole will make an unusual and beautiful bed.

In furnishing support for vines that clamber over the walls of the house, do not use strips of cloth, as so many The cloth is good for a season only. After the vines have become large and heavy their weight will be sufficient to tear the cicth loose from the tacks that held it in place, especially after a heavy rain or in strong winds, and down will come the plant. It will be found impossible to put it back in place in anything like a satisfactory manner. For supporting large, stiff vines make use of screwhooks, which are easily inserted in wooden walls. Turn the hocks in until there is just enough room between their points and the wall to admit of slipping the vine in.

Some vines are not adapted to this treatment. Those can be supported by using strips of leather instead of cloth. The leather should be soaked in oil for 24 hours before using, to make it pliable and water-resisting. Do not use small tacks, as these do not have sufficient hold on the wood to make them dependable. Use nails at least an inch long, with good-sized

FANCIES AND FADS OF FASHION By Julia Bottomley

COMFORT AND BEAUTY IN NEGLIGEES.

Hemstitched and plaited chiffon draped with a fine silk lace makes one of those airy negligee gowns which promise comfort along with beauty for the warm days of summer. More attention has been given this season to pleasing developments of these house gowns, and they have been produced in greater variety of styles and prices than ever before. All the soft and sheer materials and all the flowerlike colors are used with light nets and laces for making them. Printed volles, as lovely in coloring as the more expensive chiffon, and thin cotton crepe, vie with silk materials in the esteem of those who devote attention to de-

signing them. Some models are shown made of thin silk, and many lingerie morning gowns are of the sheerer cottons in plain white, with lingerie laces, net and embroidery used for their embellishment. Where the matter of keeping cool need not be considered beautiful empire slips of light-colored taf-

long coats, or they form a background for coats of net and lace or other thin materials. In any case ribbons and made roses of silk or chiffon play some part in the exquisite ensemble

The gown pictured here is draped with a wide lace flouncing which covers a considerable portion of it. It is light-pink chiffon and its profuse trimming enlightens us to the fact that it is made to please the eye and to provide the most becoming and least burdensome of summer clothes. A soft cap of chiffon and lace is sup-

ported by a covered wire about the face. Roses of satin ribbon set in green ribbon foliage, and hanging loops and ends, supply adornment in keeping with the gown. Nearly all negligees are straight

hanging or have an empire waistline, and all of them are more or less be ribboned.

Boudoir moccasins made of heavy satin ribbon are fastened with elastic bands covered with ribbon. Little buckles, made of tiny ribbon flowers In several colors, make up the final detail of a captivating negligee toilet.

ALL SORTS OF SPORTS HATS.

Sports and outing hats are classed as one in a new department of millinery that stands for the spirit of the times. There are all sorts of sports hats, from the low-priced but chic fabric-covered shapes which one may buy for a very few dollars, to the expensive hand-wrought shapes with handmade garnitures that cost their possessors several times \$10. But sports hats are luxuries which all may enjoy-an extra hat with which the new woman expresses her devotion to out-of-doors and the pleasures of summer time.

Besides innumerable fabric-covered hats there are sports hats made of millinery braids and other millinery materials which give designers ample opportunity to depart from the ordinary in creations unlike other millinery. Originality is much prized and the fancy is allowed free play in hats of this character, so that unexpected and even bizarre novelties find ready following. Among the most successful of those lately produced are shapes with round crowns and flexible brims. covered with Turkish toweling in cream color. Fruits and flowers are made of this unpromising material for trimming them, but paint has become a part of the milliners' equipshow what the artist can do with ern seas,

homely material. These hats are high in price and in the favor of fashionables.

A hat made of small silk pieces in many different colors, joined together with hemstitching, appears to be inspired by the "crazy quilt" of other days. As patchwork is an American art this bit of bright headwear ought to appeal to Americans. At any rate it is faced with a plain satin and is beautifully made, flaunting its gay colors among fine Panamas and Bangkoks whose elegance is never questioned.

Stripes have lodged themselves firmly in the popular mind as the best of the several styles in materials used for sports hats and other sports clothes. A hart and sweater coat are pictured here made of blue and white knitted fabric, and a hat of white canvas cloth with varicolored stripes. They are dependable styles for outing

New Colors.
